

Changes to NAGS logo'd parts guidelines

Effective May 1, 2026, Safelite Solutions will begin processing logo'd parts with NAGS part numbers under the same requirements as OEM parts.

This means the NAGS logo'd parts will require:

Prior approval
from insurer.

Documentation as per
the OEM guidelines.

Invoices that include a NAGS logo' part and do not have proof of prior approval and proof of purchase documentation will be paid down to non-logo'd NAGS rates per the insurer requirements.

Example of NAGS logo'd parts

Mopar (FCA) and Carlite/Carlex (Ford) most prevalently offer logo'd parts with NAGS part numbers. Examples include logo'd parts containing RAMs logo, Jeep logo and F150 logo.

Under the new guidelines, if part number DW02436 GTYN is included in an invoice, it will be treated as OEM.

Example: DW02436 GTYN = 68275578AC pictured on the left.
